DRAFT SYLLABUS: CEN 4072/6070
SOFTWARE TESTING AND VERIFICATION

Spring 2010

Description: Software Testing and Verification is a survey course on concepts, principles, and techniques related to software testing and formal program verification. Students will become acquainted with both the strengths and limitations of various functional and structural testing methods, as well as techniques for proving the functional correctness of sequential programs. Topics include: black-box and white-box test case design strategies, incremental integration testing techniques, inspections and reviews, axiomatic verification techniques, predicate transforms, and function-based verification. Students will have the opportunity to practice the techniques presented in class via optional exercises.

Prerequisites:
(1) Successful completion of an upper division undergraduate or graduate-level software engineering survey course (such as CEN 3031/5035), or comparable professional experience. (Off-campus EDGE students currently employed as software professionals automatically meet this requirement.)
(2) Familiarity with programming using a high-level language (C, C++, Java, etc.), and
(3) Basic knowledge of algorithms, data structures, object-oriented design principles, and discrete math.
Note: item (1) will be strictly enforced. If you do not meet this prerequisite, please plan to enroll in CEN 3031/5035 when offered and then register for CEN 6070 in Spring 2011. See the instructor for additional information.

A self-assessment pre-test is available at the course website to assist students in determining their preparedness for the course vis-a-vis coverage of a small subset of prerequisite knowledge.

Instructor:
Steve Thebaut, E314-A, Phone: (352) 450-5530, E-mail: smt AT cise DOT ufl DOT edu
Office Hours (on-campus students): W/F 9:30-10:30 EST or by appt.

Course Meeting Times and Location for On-Campus Students:
Wednesday: 6th (12:50-1:40), Friday: 5th and 6th (11:45-1:30)
Room: CSE 107 (tentative)

Course Web Site: Temporary Site (no password required): www.cise.ufl.edu/class/cen6070/temp.html
After the first week of classes, registered students will need a GatorLink account and password to access the website via the E-Learning System at http://lss.at.ufl.edu. Instructions will be provided in class.

Course Materials: Lecture notes will be made available on the course web site in PDF format. A collection of required readings may be purchased as a packet from University Copy & More, 1620 W. University Avenue, (352) 372-7436. An optional textbook, Pezze and Young’s Software Testing and Analysis, Wiley, 2008, is recommended for students who wish to have additional software testing and analysis reference material at their disposal.

Examinations and Grades: Course grades will be based SOLELY on two equally weighted 90-minute exams. A histogram of numeric scores will be provided with solution notes for each exam. Course letter grades will be determined at the end of the semester based on separate "curves" for CEN 4072 and CEN 6070 students.

Exam schedule for BOTH on- and off-campus students:
Exam 1: (topics through "Testing Tools" + associated readings) -- Friday, February 26 (tentative);
Exam 2: (remaining topics + associated readings) -- Friday, April 16

Exam Procedures for EDGE Students: Proctors will be instructed to schedule a SINGLE EXAM TIME for all students at each site or location on each of the two specified exam dates. If this is not possible for any reason, students must contact the instructor well in advance to discuss making other arrangements. Proctors should return electronic copies of completed exams via FAX or e-mail directly
to the instructor ASAP after administration.

Make-Up Exam Policy: Students are expected to be available at scheduled exam times. Do not schedule elective activities (family gatherings, business or interview trips, etc.) that conflict with scheduled exams. If missing an exam is unavoidable (e.g., due to sickness, accident, or other reasons beyond your control), contact the instructor as far in advance as possible. Make-up exams may be administered orally. Note that depending on the circumstances, it may NOT be possible to administer a make-up exam before the end of the term. In such cases, a course grade of "I" (incomplete) may be assigned.

Outline of Course Topics: The following topical areas will be covered in the order listed.

- Intro to V&V Techniques and Principles
- Requirements and Specifications
- Black-Box Test Case Design Strategies
- Partition Testing
- Combinatorial Approaches
- Other Strategies
- White-Box Test Case Design Strategies
- Logic Coverage
- Dataflow Coverage
- Path Conditions and Symbolic Evaluation
- Other Strategies
- Integration and Higher Level Testing
- Testing Object-Oriented Software
- Reviews and Inspections
- Testing Tools
- Formal Program Specification
- Axiomatic Verification
- Weak Correctness
- Rules of Inference
- Strong Correctness
- Predicate Transforms
- Proving Strong Correctness
- Computing Weakest Pre-conditions
- Functional Verification
- Complete and Sufficient Correctness
- Axiom of Replacement
- Correctness Conditions
- Iteration Recursion Lemma
- Revisiting Loop Invariants
- Cleanroom Software Engineering

Problem Sets: There are 7 non-graded, optional problem sets, covering the areas:

1. Black-box Testing
2. Logic Coverage
3. Dataflow Coverage
4. Path Conditions and Symbolic Evaluation
5. Axiomatic Verification
6. Predicate Transforms
7. Functional Verification

Some problems may be non-trivial and/or require the creative application of techniques presented in class. You are encouraged to work on the problem sets either alone or in groups, and to meet with the TA and/or instructor to discuss your work as desired. Problem set introductions, discussions, hints, and solution reviews will be provided in class. Note that exams assume a thorough understanding of the problem sets and their solutions.

Class Attendance Policy: Students are expected to view all recorded lectures and are responsible for any recorded announcements made in class. On-campus students are NOT required to attend live lectures.

Computer Facilities: Access to e-mail and the WWW is required.

Academic Integrity: All students admitted to the University of Florida have signed a statement of academic honesty committing themselves to be honest in all academic work and understanding that failure to comply with this commitment will result in disciplinary action. This statement is a reminder to uphold your obligation as a UF student and to be honest in all work submitted and exams taken in this course and all others.

You will be asked to sign the following statement on both exams in this course: On my honor, I have neither given nor received unauthorized aid on this exam and I pledge not to divulge information regarding its contents to those who have not yet taken it.
Accommodation for Students with Disabilities: Students requesting classroom accommodation must first register with the Dean of Students Office. That office will provide the student with documentation that he/she must provide to the course instructor when requesting accommodation.

UF Counseling Services: Resources are available on-campus for students having personal problems or lacking clear career and academic goals. The resources include:

- University Counseling Center, 301 Peabody Hall, 392-1575: personal and career counseling.
- SHCC Mental Health, Student Health Care Center, 392-1171: personal and counseling.
- Center for Sexual Assault/Abuse Recovery and Education (CARE), Student Health Care Center, 392-1161: sexual assault counseling.
- Career Resource Center, Reitz Union, 392-1601: career development assistance and counseling.

Software Use: All faculty, staff and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

Instructor Biography: Steve Thebaut received the BA in Mathematics from Duke University in 1977, and the MS and PhD in Computer Science from Purdue University in 1979 and 1983, respectively. He is currently Associate Chair of the CISE Department. Dr. Thebaut’s research interests include software requirements engineering, testing and verification, and software engineering technology transfer. He has received funding from the National Science Foundation, IBM, the Florida Department of Education, the Florida High Technology and Industry Council, the Sino-Software Research Center at HKUST, the Software Engineering Research Center, and the Software Engineering Institute (SEI) at Carnegie Mellon University, where he was an invited lecturer in the SEI production of "Software Project Management," a nationally distributed video-based continuing education course. He has been a course developer and consultant for IBM’s IS&PG Technical Education program, and has served on the program committee of the Conference on Software Engineering Education. He was Associate Editor of the International Journal of Computer and Software Engineering from 1990-1996.
