Here are some instructions for registering and enrolling a course in Myitlab. Make sure you have your Myitlab access code ready before you follow these instructions. For details on purchasing the Myitlab access code, please refer to the course syllabus.

Once you have the access code, please go to the myitlab site (http://www.myitlab.com/). Click the Student button under "FIRST-TIME USER".

A new window (License Agreement and Privacy Policy) will pop up. Click on the I Accept button as shown in the image below.
Now, if you already have a Myitlab account, select Yes and input your login name, password and the Access Code. If you don’t have a myitlab account, click No. Create your login name and password and input your Access Code. We recommend you use your UF email account (for example: IamAGator@ufl.edu) as your login name. Click the Next button as shown in the image below.
Input your account information such as name, email address, school information etc. Note that the name you input here must be identical to your name in the UF registrar’s office. Click the Next button as shown in the image below.
If the information you input is valid, you will be directed to the Confirmation and Summary page. Do NOT click the Log In Now button yet. If this is your first time using Myitlab, you may need to install some software packages. Now input the following address in your browser: http://www.myitlab.com/

Click the link inside the Installation Wizard area on the top-right corner of page as shown in the image below. The wizard, which consists of 4 major steps, helps you install the software you need to access and complete the exercises and multimedia content in this course. After the installation, click on LOGIN → STUDENTS to login to Myitlab.

When you log in for the first time, there will be nothing under the My Courses subwindow as shown in the image below. To enroll in a course, click the Enroll in a Course button and input the Course ID given to you by your TA on the first day of class. Please note that each section has a different Course ID. If you don’t know your course ID, please contact your TA. TAs’ emails are available in the course website or in the syllabus. If you accidentally enroll in a wrong section, please contact the head TA immediately to have you removed so that you can re-enroll in the correct section.
Once you are successfully enrolled, an icon for the course you enrolled in will appear in the My Courses subwindow. To enter your course, click on the course icon, as shown below.

You can now access your course material, and do your homework. If you have any further questions, please contact your TA.
